Duraplast®

All Plastic Foamboard

100% Biodegradable

100% Recyclable

BIODEGRADABLE Polystyrene Foam Center: Rigid foamboard breaks down in landfills or composting environments in 1 to 5 years, whereas conventional foamboards will not biodegrade for 80 to 450 years. Formulated with not less than 15% recycled content. The breakdown of the BIODEGRADABLE foamboard will not begin until the board is discarded.

LINERS: Smooth, super white high-impact facers are washable and screen printable. All-plastic cap sheets are also recyclable and biodegradable. The surface is pH neutral and compatible with cold laminating films and liquid laminating formulas.
