Foamcell[®]Green

Recycled Foam PVC

- 70% Recycled / 30% Virgin
- Indoor/Outdoor Use
- Low Flammability (UL-94VO)
- Low Water Absorption
- Lightweight

thru Foamacell

Foamacell Green is an earth-friendly recycled foam PVC sheet comprised of 70% post consumed recycled material and 30% virgin foam PVC. The properties and benefits of standard foam PVC did not suffer in this process, on the contrary we have just gained in the responsibility of doing our part in not using up valuable landfill space and resources. This is the cutting edge way of combining ecological responsibility and performance
