InSite®

Biodegradable Foamboard

- Contains no lignin
- Free from metallic impurities
- Free from residual impurities such as bleach, sulfur or peroxide
- Contains no rosin or alum rosin sizing
- Is stable under ultraviolet light

BIODEGRADABLE Polystyrene Foam Center: Rigid foamboard breaks down in landfills or composting environments in 1 to 5 years, whereas conventional foamboards will not biodegrade for 80 to 450 years. Formulated with not less than 15% recycled content. The breakdown of the BIODEGRADABLE foamboard will not begin until the board is discarded.

LINERS: Insite® Biodegradable is faced with smooth, bright white paper liners formulated from wood products certified by the Sustainable Forest Initiative (SFI), the largest forestry products certification program in North America
