Eco-Solvent Printer

What makes our printer a **green** printer...

...it's all about the **ink.**

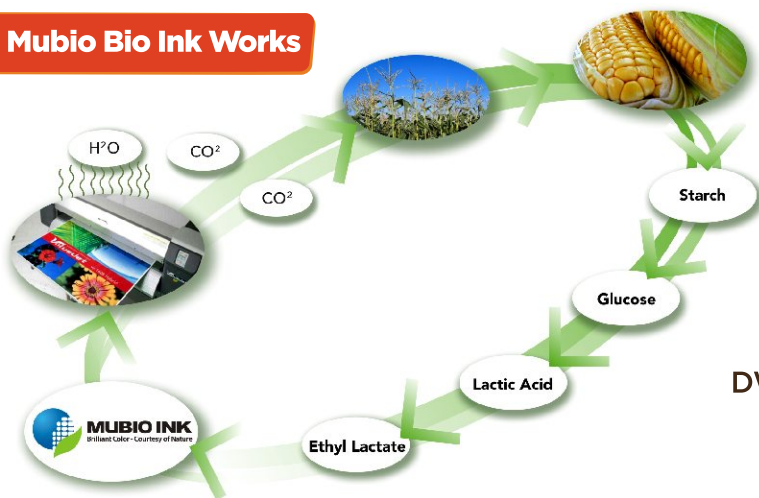

Mutoh's ValueJet 1608 hybrid printer uses MUBIO INK, which is composed of 80 percent plant-derived substances and contains no VOCs (Volatile Organic Compounds). The ink has also been recognized by the Environmental Protection Agency's Design for the Environment program.

New regulations call for dramatic reduction of VOCs containing HAP's (Hazardous Air Pollutants). For every pound of vegetable oil used to replace petroleum, carbon dioxide in the atmosphere is reduced by 2.77 pounds!

Environmental Issues Are Not a Passing Trend.

How Mubio Bio Ink Works
