FalconBoard®

Hexacomb® Rigid Graphic Board

- Made with SFI certified, all natural, renewable virgin and post-consumer fibers
- 100% Recyclable
- Renewable and reusable
- Zero chlorofluorocarbons
- Uses up to 20% recycled paper content

The Environmentally Responsible Graphic Board

Hexacomb® Falconboard is the only graphic display board made from reusable, renewable and 100% recyclable kraft paper honeycomb material. Falconboard offers designers and printers a truly recyclable, environmentally-conscious product that helps divert millions of pounds of waste from landfills.

Falconboard consists of a SFI* certified, natural kraft core with white clay-coated or natural linerboard facings. Produced with up to 20% chlorofluorocarbon-free recycled paper content, Falconboard emits zero volatile organic compounds (VOCs). These qualities make for an excellent “green” alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC).

Falconboard’s printing capabilities equal that of foam boards, including use of wide format and digital solutions. Its unique structure can handle the most demanding of graphic display requirements due to its high rigidity and dimensional stability.
